

MATH BINGO

1-DIGIT ADDITION, NO CARRYING

MATH BINGO

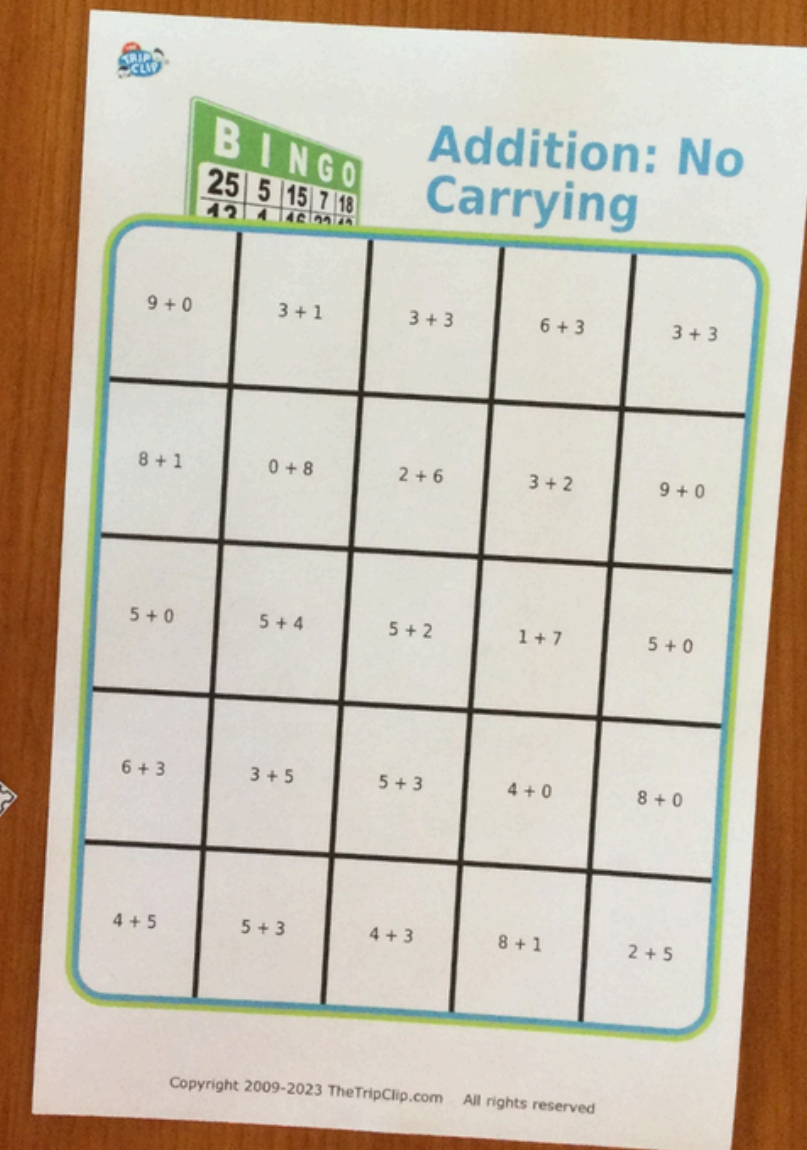

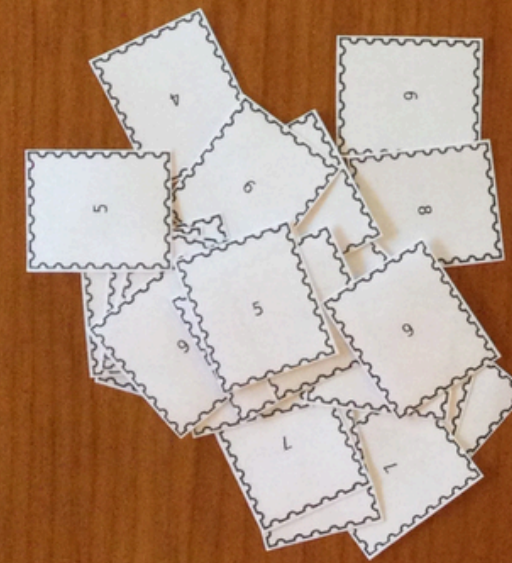

Games are an excellent way to help kids learn, and these math BINGO games are no exception! Instead of having kids do endless worksheets, play these bingo games to practice the same skills while keeping kids engaged and having fun.

You can print these each time you need them or laminate them to re-use them.

You can use this as a full class activity, in small groups where the kids take turns doing the call, or send it home for extra practice with a parent's help.

Math Bingo

1-digit addition
no carrying

Make your own math bingo
games at any difficulty!

HOW TO ASSEMBLE & PLAY

1. Print the 30 boards and the calling cards
2. Laminate all the pages (optional)
3. Cut the 15 pages of Bingo boards in half to create 30 boards
4. Cut apart the 25 calling cards and store them in a Ziploc bag
5. Hand out the Bingo boards and dry erase markers or physical markers
6. Choose a random calling card from the Ziploc bag.
7. Read out the number/answer on the calling card
8. Kids will find an addition problem on their board that adds up to the number called out
9. When they figure out the answer, they can mark it off on their board (if the answer appears multiple times, they can choose which one to mark off)
10. When they get five in a row - horizontally, vertically, or diagonally - they win!

OTHER IDEAS FOR LEARNING

1. After each calling card, give the kids a chance to quietly mark their boards on their own. Once they've done that, ask someone to read the addition problem they found. Then ask if someone else found a different problem that adds up to the same number. Write all the correct equations on the board. Let anyone who marked the wrong answer fix it.
2. Let kids take turns picking a calling card out of the bag and reading it out loud.
3. Have the kids write down the answer in the box when they find a correct one. When they declare BINGO, have them read each equation and answer out loud to check their work.

WHAT'S INCLUDED

- 30 unique bingo boards with 1-digit + 1-digit math problems on them (no carrying)
- 25 calling cards with the answers to the 25 problems
- Color, black and white, 8.5x11, & A4 versions of all 30 boards
- Instructions for assembly
- Ideas for how to play and learn
