

# Potty Training in 9 Steps

Step 1: Introduce the idea and raise awareness starting around age 1

Step 2: Between 18 & 30 months, watch for signs of readiness: dry diaper, awareness, interest

Step 3: Choose your potty. Try an insert for your toilet and a stool, unless your child is nervous about falling in!

Step 4: Choose your timing carefully - you'll need to be at home 24/7 if at all possible.

Step 5: Set a schedule. Have your child sit every hour, or before and after transitions (meals, naps)

Step 6: Teach proper hygiene right from the start.

Step 7: Reward and praise liberally!

Step 8: Start nighttime training when morning diaper is dry a few days in a row

Step 9: Be patient and encouraging, don't worry about setbacks
